KANTI BEVERAGES PVT LTD.
Quality Engineer

INTRAVIS offers premium quality control systems for plastic bottle manufacturers, fillers, injection molders and preform producers. A comprehensive inspection of each preform for a huge range of defects takes place. Moreover, measurements are carried out in the areas of the thread, body and gate. Even the cavity number of each preform can be read providing detailed cavity related statistics.

Project

- **Pre Order:** Pre Order extension & Backorder extension allows customers to place the order to the products which are not available at the current purchase. With the support of Pre Order module, customers can keep going to process checkout with unavailable or out-of-stock products easily.
- **FAQ:** FAQ extension enables customers to look for common inquiries, ask and get answered on the Knowledge Base and FAQ lists. Admins can create an informative SEO-friendly FAQ page with all necessary features.
- **Product Labels:** Product Labels extension helps attract customers' attention and motivates purchasing behavior. Also, Product Labels module allows admins to customize labels quickly and freely.
- **Free Gifts:** Free Gifts extension allows store owners to offer customers free gifts with purchase - 'surprise and delight moment' attached with specific products. This module is an effective solution to build customers' retention and boost sales significantly for online retailers.
- **SMS Notification:** SMS Notification allows sending important SMS notifications to customers and store admins. Customers can be notified instantly via SMS about their order/sales documents creation & other activities as sharing, subscription. Store admins receive SMS alerts about store activities and common errors.

Project personal

NOTBLOX Affordable Housing Project: Assembling Sustainable Communities with Insulating Concrete Forms

02 / 2019

- The jury called this design "handsome and sophisticated" and commended it on its demonstration of the ease of its construction. The project also demonstrated many options for the use of vinyl.

The S House: A Passive House

06 / 2019

- The form, structure and mechanical features of the building are integrated into a single shell. For example, the louvers also act as a screen along the facade of the building.

South Region Winner

07 / 2021

- This project demonstrates how a simple plan can produce a project with the potential to transform over time. The space adjusts to become a larger home or a multi-generational living space by exploring modularity and production. The team took consideration in orienting the home in relation to the sun, as well as the use cost-effective manufacturing construction techniques. The green roof offers an inexpensive solution to storm water management and reducing cooling loads in the summer. It also provides an additional outdoor space for the home. The jury commended the design, describing it as a “handsome, visual notion of what a Habitat house could be”.

North Region Winner

02 / 2022

- This project was commended for the lightweight, strong and durable components of the design, as well as the presentation that explicitly described how the project would be constructed. The design looks to the future of modularity in factory components and their application to design. This project was also commended for its use of vinyl as a material rather than a building component in its use as surface and structure blending into one.
